

## 2009 AIA/CES Registered Provider Application Provider Program Summary

Provider Name: **LSI Corporation of America**  
Provider No.: **T102**

Program Title: **Specifying Green Casework**  
Program No.: **LSI 001**  
Length: 1.0 hours  
Credits: 1.0 LU hours  
HSW: Yes  
Sustainable Design: Yes

Learning Objectives: Participants will learn:

1. An overview of the “green” movement in the casework industry
2. Design categories and qualification requirements for LEED certification
3. Introduction to casework components
4. Selection of available casework products to meet “green” criteria

Facilitator Qualifications:

1. Judy Stephenson  
Four decades in construction industry. Sixteen years in laminate casework manufacturing. Experienced in marketing, architectural sales and presentations on a national and regional basis.

Method of Delivery: The CES facilitator encourages discussion during a presentation format. Program is not designed as a lecture but to be interactive with audience.

AV needed: Although not required, if visual requirements of the room and number of guests suggest, a PowerPoint presentation could be given. A computer and/or projector would be needed. Program outlines will be distributed as handouts.

Target Audience: Architects, specifiers, owners and design professionals in the industrial/commercial market are the desired audience. The experience level will be assessed in the beginning of each presentation so the facilitator can accommodate her remarks to meet the audience’s needs.

Costs: N/A
